

Table of Contents

1. INTRODUCTION.....	1
1.1 WHO WE ARE.....	1
1.2 NX2	1
1.3 HOW TO USE THIS BOOK AND HOW IT IS ORGANIZED	2
1.4 THE FORMAT FOR THIS BOOK INCLUDES THE FOLLOWING	2
1.5 A GENERAL PHILOSOPHY FOR MODELING.....	2
1.6 MANAGING CHANGE	3
1.7 WHAT MANAGERS NEED TO KNOW ABOUT NX2	3
1.8 PARAMETRICS THE EASY WAY	3
1.9 LINKING PARTS	4
2. OPTIMIZING NX2 SETTINGS.....	5
2.1 INTRODUCTION	5
2.2 SAVE LAYOUT	5
2.3 SELECTION DELAY	7
2.4 SMOOTH VIEW CHANGE	8
2.5 SHADED FACE EDGES	9
2.6 ASSIGNING FEATURE NAMES IN A PART	10
2.7 USING GRID.....	11
2.8 REMEMBERING MATING CONSTRAINT.....	12
2.8.1 Mating Fasteners	12
2.9 USER DEFINED FEATURES	14
2.9.1 Creating Custom Directory and Libraries	14
2.9.2 Creating User Defined Feature	17
2.9.3 Adding Palette.....	21
2.9.4 Using User Defined Feature.....	22
2.9.5 Practice Project.....	25
3. ORGANIZING DATA.....	27
3.1 INTRODUCTION	27
3.2 LAYERS CATEGORY.....	27
3.2.1 Creating a New Category	27
3.2.2 Deleting a Category.....	29
3.2.3 Renaming a Category	29
3.3 REFERENCE SETS.....	30
3.3.1 Automatic Reference Sets.....	30
3.3.2 Creating a User Defined Reference Set	31
3.3.3 Reference Sets & Assemblies	32
3.3.4 Modifying a Reference Set	33
3.3.5 Changing Reference Set in an Assembly.....	33
3.4 COMPANY STANDARDS - SETTING CUSTOMER DEFAULTS.....	35
3.4.1 Setting Default File Units	35
3.4.2 Changing Drawing Display	35
3.4.3 Drawing Width Display	36
3.4.4 Grid Parameters	36
3.4.5 Custom Plot Settings.....	36
3.4.6 Drafting Preferences.....	37
3.5 COMPANY STANDARDS - IMPORTING DRAWING FORMAT	40
3.5.1 Importing Part with Drawing Border	40
3.5.2 Creating Drawing Templates and adding them in Resource Bar	40
3.6 VERSIONING	45
3.6.1 Setting Versioning Rules.....	45

3.6.2 Loading Assemblies with Versioned Components.....	46
3.7 DIRECTORY STRUCTURE.....	47
3.7.1 Starting the Project.....	47
3.8 EXPORTING DATA FROM THE NAVIGATOR.....	48
3.8.1 Exporting data from the Navigator.....	48
3.9 SELF TEST.....	51
3.10 TEST ANSWERS.....	52
4. MASTER MODELING.....	53
4.1 WHAT IS A “MASTER MODEL?”.....	53
4.1.1 Setting Customer Default File to Allow Interpart Modeling.....	54
4.2 CREATING A NON-MASTER FILE.....	55
4.2.1 Creating a Non-Master Part File.....	56
4.2.2 Master Modeling for Various Applications.....	61
4.2.3 Master Modeling for Drafting.....	61
4.3 SELF TEST.....	63
4.4 TEST ANSWERS.....	64
5. EXPLORING SKETCHER POTENTIAL.....	65
5.1 INTRODUCTION.....	65
5.2 SKETCHES WITH MULTIPLE PROFILES.....	65
5.2.1 Creating Multiple Profiles in a Sketch.....	65
5.3 ALTERNATE SOLUTION TO DIMENSION.....	67
5.3.1 Using Alternate Solution.....	67
5.4 USING CURVES AND EDGES FROM EXISTING GEOMETRY.....	69
5.4.1 Adding Existing Curves to Sketch.....	69
5.4.2 Projecting Edges and Curves to Sketch.....	69
5.5 CREATING BACKBONES FOR FREE FORM FEATURES.....	72
5.5.1 Creating Sketches for Free Form Features.....	72
5.6 USING POSITIONING DIMENSIONS AND FIXED POINT CONSTRAINT.....	76
5.6.1 Creating a Fully Constrained Sketch Using Fixed Point.....	76
5.6.2 Creating Positioning Dimensions.....	76
5.6.3 Editing Positioning Dimensions.....	78
5.7 USING PERIMETER DIMENSION.....	79
5.7.1 Creating Perimeter Dimension.....	79
5.8 EDIT DEFINING STRING IN SKETCHER.....	82
5.8.1 Edit Defining String.....	82
5.9 REATTACHING A SKETCH.....	85
5.9.1 Reattach.....	85
5.10 RE-USING SKETCHES.....	88
5.11 SELF TEST.....	93
5.12 TEST ANSWERS.....	94
6. ADVANCED CURVES.....	95
6.1 INTRODUCTION.....	95
6.2 LAW CURVES.....	95
6.2.1 Creating Law Curve by Equation.....	95
6.2.2 Cam Slot.....	97
6.3 SPLINE THROUGH POINTS.....	99
6.3.1 Create Spline Through Points.....	99
6.4 THE BRIDGE CURVE.....	100
6.4.1 Create bridge curves to join two blocks.....	100
6.5 JOIN CURVE.....	102
6.5.1 Creating Join Curve.....	102
6.5.2 Editing Join Curve.....	103
6.6 INTERSECTION CURVE.....	104
6.6.1 Creating Intersection Curve.....	104
6.7 SECTION CURVE.....	105

6.7.1	Creating Section Curves with Select Planes Method.....	105
6.7.2	Creating Section Curves with Parallel Planes Method.....	106
6.7.3	Creating Section Curves with Radial Planes Method.....	107
6.7.4	Creating Section Curves with Planes Perpendicular to a Curve Method.....	108
6.8	OFFSET IN FACE.....	110
6.8.1	Creating Curve using Offset in Face.....	110
6.9	WRAP/UNWRAP CURVE.....	112
6.9.1	Wrapping a Curve on a Cylindrical Face.....	112
6.10	COMBINED PROJECTION.....	114
6.10.1	Creating 3D Curve Using Combined Projection.....	114
6.11	PROJECTION CURVES PROJECT.....	117
6.11.1	Create Datum Planes.....	117
6.11.2	Create 1 st Sketch on top offset Plane.....	118
6.12	SELF-TEST.....	119
6.13	TEST ANSWERS.....	120
7.	EXPRESSIONS.....	121
7.1	INTRODUCTION.....	121
7.2	INPUTTING THE VALUES.....	122
7.2.1	Basic Expressions.....	122
7.2.2	Changing Expressions.....	125
7.3	CREATING EXPRESSIONS DURING MODELING.....	126
7.3.1	Creating Expressions on the Fly.....	126
7.4	RENAMING EXISTING VARIABLES.....	131
7.4.1	Renaming Existing Variables.....	131
7.5	USING OPERATORS AND CONDITIONS IN EXPRESSIONS.....	133
7.5.1	Adding Formula in Expressions.....	133
7.5.2	Adding Logical Statements in Expressions.....	134
7.5.3	Adding Comment within Expressions.....	134
7.6	USING BUILT-IN NX2 FUNCTIONS.....	136
7.6.1	Built-in-Functions for Unit Conversion.....	136
7.6.2	Other Mathematical Functions.....	136
7.7	USING SPREADSHEET TO EDIT EXPRESSIONS.....	138
7.7.1	Using Spreadsheet to Edit Expressions.....	138
7.8	IMPORTING AND EXPORTING FILES OF EXPRESSIONS.....	139
7.8.1	Creating and Importing an Expression File.....	139
7.8.2	Exporting an Expression File.....	140
7.9	INTERPART EXPRESSIONS.....	141
7.9.1	Setting Customer Default File to Allow Interpart Modeling.....	141
7.9.2	Creating Linked Expressions.....	142
7.10	GEOMETRIC EXPRESSION.....	145
7.10.1	Creating Geometric Expressions.....	145
7.10.2	Creating Geometric Expressions Continued.....	147
7.11	SUPPRESS BY EXPRESSION.....	149
7.11.1	Suppress by Expression.....	149
7.12	THE DOOR LATCH PRACTICE.....	152
7.13	EXPRESSIONS EDITOR PROJECT.....	153
7.13.1	Create sketch.....	153
7.14	SELF-TEST.....	155
7.15	TEST ANSWERS.....	156
8.	GREAT SURFACES.....	157
8.1	SURFACE PHILOSOPHY.....	157
8.2	BRIDGE SURFACES.....	157
8.2.1	Creating Bridge Surface with Primary Faces.....	157
8.2.2	Creating Bridge Surface with Primary Faces and Side Strings.....	159
8.3	THE SWEEP SURFACE.....	161
8.3.1	Swept Surface with Multiple Guide Strings.....	161

8.3.2 Swept Surface with Forced Direction	162
8.3.3 Swept Surface with Scaling Method Area Law	166
8.4 THE N-SIDED SURFACE	169
8.4.1 Trimmed Single Sheet using N-sided Surface	169
8.4.2 Multiple Triangular Patches using N-sided Surface.....	172
8.5 ENLARGE SURFACE	174
8.5.1 Enlarge Surface	174
8.5.2 Using a Solid Face to Create an Enlarge Surface.....	175
8.6 TRIMMED SHEET.....	178
8.6.1 Trimmed Sheet Using Isoparametric Curves	178
8.6.2 Trimmed Sheet Using Isoparametric Curves.....	179
8.7 LAW EXTENSION	181
8.7.1 Law Extension using Dynamic method	181
8.7.2 Law Extension using General method	183
8.8 ROUGH OFFSET	185
8.8.1 Rough Offset	185
8.9 STYLED BLEND.....	187
8.9.1 Styled Blend Using Curves.....	187
8.10 CORNER.....	190
8.10.1 Corner Using Transition.....	190
8.11 HOW HEAVY IS A SURFACE	194
8.11.1 Controlling Poles.....	194
8.12 SURFACE USING LAW CURVE.....	196
8.12.1 Creating a Surface for Parabolic Mirror using the Law Curve.....	196
8.13 SELF-TEST	199
8.14 TEST ANSWERS.....	200
9. INJECTION MOLDED PARTS AND CASTINGS.....	201
9.1 INTRODUCTION	201
9.2 TAPER FROM EDGES	201
9.2.1 Taper From Edges	201
9.3 BODY TAPER	203
9.3.1 Body Taper using a surface	203
9.3.2 Undercut Taper.....	205
9.4 ISOCLINE CURVES.....	206
9.4.1 Isocline Curves	206
9.5 SUBDIVIDE FACE	209
9.5.1 Subdivide Face.....	209
9.6 SEWING SURFACES	212
9.6.1 Sewing.....	212
9.7 PATCHING SURFACES AND SOLIDS	215
9.7.1 Patching Surfaces and solids	215
9.7.2. PROJECT	217
9.8 RIBS.....	219
9.8.1. Creating Ribs using Swept Free Form Features.....	219
9.9 REDUCING SURFACE PATCH COUNT USING JOIN CURVES	223
9.9.1 Surface using Joined Curves.....	223
9.10 LIPS	225
9.10.1 Lips Using Extrude	225
9.10.2 Lips Using Swept	226
9.11 HEAT STAKES	229
9.11.1 Using Suppress by Expression for Heat Stake Feature.....	229
9.11.2 Creating Deformable Part for Heat Stake feature.....	231
9.11.3 Adding Deformable Part with Heat Stake feature	232
9.12 SNAP-FIT	234
9.12.1 Adding Snap-fit as a UDF.....	235
9.13 PLASTIC RULES OF THUMB.....	239
9.13.1 Effect of Surface Texture on Draft Angle.....	239

9.13.2 Nominal Wall Thickness	239
9.13.3 Radius	240
9.13.4 Ribs and Gussets	240
9.13.5 Bosses	240
9.13.6 Sink Marks	242
9.14 FINAL PROJECT ‘PCB COMPONENT ASSEMBLY’	243
9.15 SELF TEST	255
9.16 TEST ANSWERS.....	256
10. CONSUMER PRODUCTS.....	257
10.1 INTRODUCTION	257
10.2 USING HAND SKETCHES AND PHOTOGRAPHS	257
10.2.1 Inserting Images and Exporting Curves	257
10.2.2 Importing and Positioning the Curves	260
10.3 FROM ALIAS OR OTHER ID PACKAGES TO UG	263
10.3.1 Importing IGES, STEP or Parasolid files	263
10.3.2 What to do with Imported Geometry.....	263
10.3.3 Why Gaps and Overlaps Occur and How to Resolve Them.....	264
10.4 BUILDING FEATURES ONTO MODELS WHERE THE OUTER FORM CHANGES RADICALLY	265
10.4.1 Creating an Assembly with Linked Objects	265
10.4.2 Using Linked Objects to Automatically Update the Part	268
10.5 WALL THICKNESS.....	273
10.5.1 Thicken Sheet.....	273
10.5.2 Hollow.....	274
10.5.3 Offset Sheet	275
10.5.4 Subtracting Solid.....	279
10.6 CHANGE EDGE.....	282
10.6.1 Change Edge Using Different Options	282
10.7 CHECKING FOR UNDERCUTS.....	285
10.7.1 Isocline Curve.....	285
10.7.2 Face Analysis using Slope	288
10.8 ISOPARAMETRIC CURVES	290
10.8.1 Isoparametric Curve	290
10.9 ISOPARAMETRIC TRIM / DIVIDE.....	293
10.9.1 Isoparametric Trim	293
10.9.2 Isoparametric Divide	294
10.10 FACE ANALYSIS USING REFLECTION	296
10.10.1 Face Analysis – Reflection.....	296
10.11 FACE ANALYSIS USING RADIUS.....	298
10.11.1 Finding Minimum Radius Areas	298
10.11.2 Radius Type – Normal	299
10.12 DYNAMIC CROSS SECTION	300
10.12.1 Dynamic Cross Section.....	300
10.13 VARIABLE RADIUS EDGE BLEND.....	304
10.13.1 Variable Radius	304
10.14 SELF-TEST	307
10.15 TEST ANSWERS.....	308
11. SHEET METAL FEATURES.....	309
11.1 INTRODUCTION	309
11.2 SHEET METAL FLANGE FEATURES	309
11.2.1 Using Flange Options	310
11.3 INSET FLANGE	312
11.3.1 Inset Flange	312
11.4 PROFILE FLANGE	314
11.4.1 Profile Flange.....	314
11.5 MULTI-BEND BRACKET	317
11.5.1 Multi-bend Bracket	317

11.6 GENERAL FLANGE	321
11.6.1 General Flange Using Parameter.....	321
11.7 BRIDGE.....	323
11.7.1 Bridge using Z-bend.....	323
11.8 BEAD.....	325
11.8.1 U-shaped hollow bead.....	325
11.9 PUNCH.....	328
11.9.1 Embossed Punch.....	328
11.10 CORNER.....	330
11.10.1 Corner.....	330
11.11 FORM/UNIFORM	332
11.11.1 Uniform.....	332
11.12 RELIEF.....	333
11.12.1 Creating a Relief.....	333
11.13 SOLID PUNCH	335
11.13.1 Creating a Solid Punch.....	335
11.14 BEND.....	337
11.14.1 Simple Bends.....	337
11.15 PRACTICE BRACKET	338
11.16 SHEET METAL FINAL PROJECT	340
11.16.1 Create sketch.....	340
11.17 WELDMENT ASSEMBLY PROJECT.....	349
11.17.1 Weldment Project.....	349
11.18 SELF TEST	357
11.19 TEST ANSWERS.....	358
12. ADVANCED ASSEMBLIES.....	359
12.1 INTRODUCTION	359
12.2 LOAD OPTIONS	359
12.2.1 Load Method.....	360
12.2.2 Load Components	360
12.2.3 Load Interpart Data.....	360
12.2.4 Miscellaneous Options.....	360
12.3 OPEN BY PROXIMITY	361
12.4 USING ASSEMBLE ZONES	362
12.5 CREATING ASSEMBLY NAVIGATOR FILTERS	364
12.5.1 Enabling Filtering Mode and Creating New Filter	364
12.5.2 Adding Zone to Filter.....	364
12.5.3 Adding Components to Filter.....	366
12.5.4 Adding Proximity Filter.....	366
12.5.5 Using Filters	366
12.6 PRODUCT OUTLINE.....	369
12.7 WRAP ASSEMBLY	370
12.8 SELF TEST	373
12.9 TEST ANSWERS.....	374
13. MISCELLANEOUS TECHNIQUES	375
13.1 CONVERTING FILE UNITS	375
13.2 DEFORMABLE MODELS.....	375
13.3 MODELING PREFERENCES.....	377
13.3.1 Changing Density	377
13.3.2 Changing the Modeling Tolerance	378
13.4 SUBDIVIDE FACE	379
13.4.1 Subdividing a Face Using Wrapped Curve.....	379
13.5 JOIN FACES.....	381
13.6 MASS PROPERTIES	382
13.6.1 Mass using Solids.....	382
13.6.2 Area using Faces	382

13.6.3 Area using Curves.....	383
13.6.4 Assembly Weight Management	384
13.7 SELF-TEST	389
13.8 TEST ANSWERS.....	390
14. ADVENTURES IN DIRECT MODELING	391
14.1 A DOUBLE-EDGED SWORD.....	391
14.2 THE BASIC PRINCIPLE.....	391
14.3 CONSTRAIN FACE	393
14.3.1 Constrain Face	393
14.4 RESIZE FACE.....	395
14.4.1 Resize Face	395
14.5 OFFSET REGION.....	396
14.5.1 Using Offset Region	396
14.6 REPLACE FACE	397
14.6.1 Replace Face.....	397
14.7 MOVE REGION.....	398
14.7.1 The Move Region Command.....	398
14.8 PATTERN FACE	400
14.8.1 Pattern Face	400
14.9 SELF-TEST	403
14.10 TEST ANSWERS.....	404
15. FINITE ELEMENT MODELING.....	405
15.1 INTRODUCTION	405
15.2 SIMPLE FEM	405
15.2.1: Stress Analysis on a Cantilevered Beam.....	406
15.2.2: Stress Analysis on a Pressurized Vessel	412
GLOSSARY.....	419
INDEX.....	431
